

## **Legal and Safety Committee Report**

*(As of 1.19.24)*

The Committee worked tirelessly on developing and implementing the Neighborhood Watch program. The Committee also developed safety courtesy notices and safety warning forms. The Committee investigated a safety complaint involving a portion of the alley and assisted in removing the safety hazard.

For 2024, the Committee responded to another safety complaint and contracted to remove ten below-ground garbage containers and had their cavities filled with sand. Dead tree branches that posed a fire concern were removed along the east boundary line.

For the remainder of 2024, the Committee will complete the final stage of the Neighborhood Watch program and hope to host a home security camera presentation.
